4 DIFFICULTY LEVEL

INSTRUCTIONS FOR MAKING

SANTA CLAUS

WITH POLYMER CLAY

1 Start with beige or brown polymer clay. Roll a medium-sized ball of clay, flatten it into an oblong shape as shown in the photo to form Santa's face.

2 Roll a red ball of polymer clay into a sphere, bend it, and then flatten to create Santa's red cap. Roll a white ball of polymer clay into a sphere, flatten it and then mold it into his beard as shown.

3

Use the same white color to make a clay coil and then mold it into the bottom fluffy part of his cap. Use a sculpting cutting tool remove the excess white clay from the coil. Mold the white coil to form the bottom portion of Santa's cap as shown in the photo.

4

Attach a small white ball of clay to the end of the cap.

5

Roll a small ball of beige or brown clay and place it in the center of his face to form Santa's nose.

6

Add two very small black balls of clay to his face to form Santa's eyes. Roll a white piece of clay and taper the ends to form Santa's mustache as shown
Refer to "Polymer Clay Oven Baking Steps" to bake your Santa Claus.

Polymer Clay Oven Baking Steps

- Preheat your oven to 270 degrees Fahrenheit (or 120 degrees Celsius).
- Put wax paper on a flat cooking tray.
- Place your santa close on wax paper.
- Bake for 20 minutes.
- Carefully remove the tray and let your art cool before handling.
